Available: 403(b) & 457(b)

Minimum loan: \$1,000

Settlement options

- ★ Income for a fixed period
- ★ Single life annuity
- ★ Single life with period certain
- ★ Joint and one-half survivor

Death benefit

Greater of the account value or GMSV

For more product details, see the following pages.

Issue ages	18–85 (qualified); 0–85 (non-qualified); 18–75 (inherited IRA); 0-75 (inherited non-qualified) Issue age is the owner's age at last birthday. For joint owners, the oldest age will be used as the issue age. If the owner is a non-natural person, the age of the eldest annuitant will be treated as the age of the owner for all purposes under this contract.
Purchase payments	This product accepts a single purchase payment for non-qualified, 403(b), traditional IRA, Roth IRA, SEP IRA, SIMPLE IRA, Inherited IRA, Inherited non-qualified and 457(b) plan funds. Additional purchase payments are allowed during first two months of the contract only; minimum \$2,000 (Q); \$5,000 (NQ). Terms last for a period of one year and can begin only on the 6 th and 20 th of each month. Purchase payments received prior to the beginning of a term will be held in a holding account (referred to as a purchase payment account in the contract) until the beginning of that term. Minimum: \$10,000; Maximum: \$1 million for ages 0-75; \$750,000 for ages 76–80; \$500,000 for ages 81+
IncomeSecureSM rider (optional) R6036711NW	This guaranteed income rider offers a 7% income credit, a 10-year income rollup period and payout percentages that increase 0.10% each year your clients wait to start income payments until it reaches 7.5% for single lifetime income and 6.5% for joint lifetime income. To determine the amount of the maximum annual income payments, we multiply the income base by the income percentage. <ul style="list-style-type: none"> • The income base is the account value on the date of issue or reset election, increased by subsequent income credits and purchase payments and reduced for withdrawals. • The income percentage is based on the selected income option (single lifetime income or joint lifetime income) and the owner's age (or youngest age for joint spousal income) at the time of the first income payment. <p>This is an optional rider that must be added at issue and is available for a charge that is currently 0.95%. The charge will be taken at the end of each contract year and may increase if a reset is elected. Please note, asset allocation limits may apply to the declared rate strategy. Not available in all states. Rider issue ages: 40–85. Income payments may begin starting at age 55.</p>
IncomeSustainer[®] Plus rider (optional) R6032810NW	This guaranteed income and death benefit rider offers a 6% rollup credit for income and death benefits, and a 12-year income rollup period. In addition to providing income options, the rider provides a guaranteed death benefit to beneficiaries. The death benefit is available after the fifth contract anniversary, and replaces the death benefit available with the annuity. Lump sum and annuitization payout options are available for the rider death benefit, and beneficiaries will be able to choose the death benefit payment option most attractive to them at the time of settlement. This is an optional rider that must be added at issue and is available for a charge that is currently 1.35%. The charge will be taken at the end of each contract year and may increase if a reset is elected. Please note, asset allocation limits may apply to the declared rate strategy. Not available in all states. Rider issue ages: 50–85. Income payments may begin starting at age 55. <i>Please note that the income rollup period will end earlier under certain circumstances including the occurrence of the annuity commencement date (ACD) of the annuity contract. The ACD is generally no later than the contract anniversary following the date the owner or a joint owner reaches age 95. This means that, if the income rollup maximum period is 12 years and the contract is purchased when the owner is age 84 or above, then we may require the owner to annuitize the contract or to begin taking living benefit payments under the rider by that date, even though the owner has not received the 12 years of rollup credits otherwise available under the rider.</i>
Inheritance EnhancerSM rider (optional) R6042513NW	This guaranteed death benefit rider offers a 7% rollup credit and a 10-year income rollup period. This is an optional rider that must be added at issue and is available for a charge that is currently 0.95%. The charge will be taken at the end of each contract year and may increase if a reset is elected. Please note, asset allocation limits may apply to the declared rate strategy. Not available in all states. Rider issue ages: 50–85. Please note that this rider will terminate and all rights under it will end if the annuity is annuitized. The annuity generally requires that your clients annuitize their annuity no later than the contract anniversary following the date the owner or a joint owner reaches age 95. This means that no rider death benefit will be available if the "Insured" dies after the required annuitization date. In this case, we will refund 50% of all rider charges if the contract is annuitized for life or over a fixed period of at least five years. This refund may not be available in all states.
Extended care waiver	An extended care waiver is available for no additional charge. If the owner is confined to a nursing home or other long-term care facility after the completion of the first contract year for at least 90 consecutive days, early withdrawal charges may be waived on withdrawals up to a full surrender. Rider form R6026109NW. Form number may vary according to the state in which a contract is sold. Not available in all states; please see state approval chart for details.
Terminal illness waiver	Provided that the diagnosis is rendered more than one year after the contract effective date, up to 100% of the account value can be withdrawn without deduction of an early withdrawal charge if the owner or joint owner is diagnosed by a physician as having a terminal illness with a prognosis of 12 months or less. This rider may be used only once. Rider form R6025809NW. Form number may vary according to the state in which a contract is sold. Not available in all states; please see state approval chart for details.
Interest strategies	Upon issue, the owner selects from two types of interest strategies: a declared rate strategy and an indexed strategy . The owner has the opportunity to reallocate the account value among the available interest strategies. For amounts already in the contract, changes will be applied at the end of the current term. To change strategy selections or amounts applied for future terms, the owner must submit a strategy selection form at least five days prior to the end of the current term. Available strategies are subject to change at any time for new sales.
Interest rates	Purchase payment account interest rate: Interest is credited daily on amounts held in the purchase payment account based on an applicable interest rate. This interest rate is guaranteed to be at least equal to the guaranteed minimum declared rate. Declared interest rate: Interest is credited daily on amounts held under a declared rate strategy based on the applicable declared interest rate. The current declared interest rate will not change during the strategy's term and is guaranteed to never be below the guaranteed minimum declared rate for any subsequent terms. Current rates may vary by state; please refer to the current interest rate chart on www.GAannuity.com .

Indexed interest rate: An indexed interest rate is determined, in part, by the performance of the S&P 500® or the S&P 500 Risk Control 10% Index (SPXAV10P). Indexed interest is credited only on the last day of each term. Indexed strategies include:

- ★ S&P 500® annual point-to-point with cap
- ★ S&P 500 Risk Control annual point-to-point with participation rate

Point-to-point indexed strategy: The indexed interest rate for a term is determined by comparing the index value on the last day of that term to the value on the first day of that term. The indexed interest rate for that term equals the index change, up to the cap or multiplied by the participation rate. The indexed interest rate will never be less than 0%. Interest is credited on the last day of the term.

Strategies may not be available in all states.

Bailout rate	Safe Outlook® features a bailout on available indexed strategies. This feature allows the client to withdraw money without penalty from an indexed strategy if the cap or participation rate for that indexed strategy ever falls below its bailout rate. The bailout rate will always be below the initial rate. If the bailout feature is triggered, we will send a letter and give the client 30 days to withdraw the money from that strategy with no penalty.																
Account value	<p>The account value equals the sum of the following values:</p> <p>Purchase payment account value: The purchase payment account value equals the amount that has not been applied to an indexed or declared rate strategy, less amounts withdrawn, including any applicable early withdrawal charges on those amounts, plus interest credited daily at an interest rate at least equal to the guaranteed minimum declared rate, less any applicable premium taxes and other taxes required by each state, and less any rider fees and charges.</p> <p>Declared rate strategy value: A declared rate strategy value equals the amount applied to the declared rate strategy, less any amounts withdrawn, including any applicable early withdrawal charges on those amounts, plus interest credited at the declared interest rate, and less any rider fees and charges.</p> <p>Indexed strategy value: An indexed strategy value equals the amount applied to the indexed strategy, less any amounts withdrawn, including any applicable early withdrawal charges on those amounts, plus interest credited at the indexed interest rate, and less any rider fees and charges.</p>																
Surrender value	The surrender value equals the greater of the account value less any early withdrawal charges or the guaranteed minimum surrender value.																
Guaranteed minimum surrender value (GMSV)	The GMSV equals 90% of the purchase payments, less any withdrawals and applicable early withdrawal charges, plus interest at the current GMSV rate. The GMSV will not be less than the minimum values required by each state.																
Fees	There are no up-front sales charges or fees.																
Early withdrawal charge	<p>An early withdrawal charge is applied to full surrenders and withdrawals.</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left;">Contract year</th> <th style="text-align: center;">1</th> <th style="text-align: center;">2</th> <th style="text-align: center;">3</th> <th style="text-align: center;">4</th> <th style="text-align: center;">5</th> <th style="text-align: center;">6</th> <th style="text-align: center;">7</th> </tr> </thead> <tbody> <tr> <td style="text-align: left;">Early withdrawal charges</td> <td style="text-align: center;">9%</td> <td style="text-align: center;">8%</td> <td style="text-align: center;">7%</td> <td style="text-align: center;">6%</td> <td style="text-align: center;">5%</td> <td style="text-align: center;">4%</td> <td style="text-align: center;">0%</td> </tr> </tbody> </table>	Contract year	1	2	3	4	5	6	7	Early withdrawal charges	9%	8%	7%	6%	5%	4%	0%
Contract year	1	2	3	4	5	6	7										
Early withdrawal charges	9%	8%	7%	6%	5%	4%	0%										
Free withdrawal allowance	During the first contract year, 10% of purchase payments may be withdrawn without an early withdrawal charge. After the first contract year, 10% of the account value on the most recent contract anniversary may be withdrawn without an early withdrawal charge. The sum of all previous withdrawals during the same contract year will be subtracted to determine the amount available. Free withdrawal allowance is not cumulative, and unused amounts do not carry over to the next contract year. Please note, indexed interest is credited only at the end of a term; amounts withdrawn before the end of a term will not earn any indexed interest.																
Withdrawals	Withdrawals are allowed any time prior to the annuity commencement date. All withdrawals are subject to IRS regulations and early withdrawal charges. Withdrawals will be taken first from amounts applied to the purchase payment account, then from the declared rate strategy, and then from the indexed strategy with the shortest term. If there are multiple indexed strategies that meet that criterion, it will be taken proportionally from all indexed strategies with the shortest term. A withdrawal under the bailout provision will be taken only from funds then held under the given indexed strategy for the term that qualifies for the bailout. Amounts withdrawn from an indexed strategy prior to the end of a term will not be credited with interest. Minimum withdrawal: \$500; Minimum account value following withdrawal: \$5,000.																
Easy Systematic Payment (ESP) Program (non-contractual)	The fixed dollar and life distribution options are available. Refer to the <i>Terms and Conditions</i> section of the applicable ESP program election agreement form for eligibility requirements. ESP payments reduce the amount available under the free withdrawal allowance. Please note, indexed interest is credited only at the end of a term; amounts withdrawn before the end of a term will not earn any indexed interest.																
Loans	A loan endorsement is available for 403(b) and 457(b) contracts. Loans are subject to terms of the Loan Application and Agreement (TSAL2798). Minimum loan amount: \$1,000; minimum surrender value balance that must remain following a loan: \$500 plus collateral interest on all outstanding loans on the contract.																
Settlement options	<p>The following options are available: income for a fixed period, single life annuity, single life with period certain, and joint and one-half survivor.</p> <p>If settlement options are selected during the early withdrawal charge period, the greater of the account value or GMSV will be used to calculate the benefit.</p>																
Death benefit	The greater of the account value or GMSV will be paid upon the death of the owner. A spouse who is the surviving joint owner or sole surviving beneficiary may become the successor owner.																

Agent guidelines

The following procedures should be followed when submitting business for the Safe Outlook® annuity:

- Submit business on a **Single Premium Deferred Annuity with Multiple Interest Crediting Strategies - Request Form**.
- Complete a separate **Transfer/Rollover/Exchange Request Form** for each contract or account to be transferred.
- Complete any **Replacement Form(s)** required by each state.

Include any additional forms that may be required by each particular state.

State requirements and forms for New Business can be found on **www.GAIG.com**, in our **New Business Kit**.

Please note: Contract form numbers, request forms and disclosure documents may vary by state.

The product guide is intended only to provide a summary of this annuity product. In order to obtain a complete understanding, please read the contract provisions carefully as this is not intended to be a substitute for the contract.
